Among the numerous discoveries Science has made in this generation to facilitate the business of life, increase its enjoyment, and even prolong the term of human existence, none reached market. Nearly all that has yet arrived has been | can be named of more real value to mankind than this contribution of Chemistry to the Healing Art. A vast trial of its virtues throughout this broad country, has proven beyond a doubt that no medicine or combination of medicines yet known can so surely control and cure the numerous varieties of pulmonary disease which have hitherto swept from our midst thousands and thousands every year. Indeed, there is now abundant reason to believe a remedy has at length been ound which can be relied on to cure the most dangerous affections of the laugs. Our space here will not permit us to publish any proportion of the cures affected by its use, but we would present the following opinions of eminent men, and They will be received at my Cooper Shops in this place, or refer further enquiry to the circular which the Agent below on the bank of the River at any point between this place and Wilmington.
